

Fleetguard Access Introduces Online Invoicing

Fleetguard Access

Cummins Filtration is pleased to announce that invoices can now be viewed online through Fleetguard Access. In order to better serve our customers, online invoices will be available to registered Fleetguard Access users who are currently authorized to view invoicing information. This new functionality is available through the Fleetguard Access Order Management Inquiry on cumminsfiltration.com. The new invoicing feature was added specifically to address customer feedback. This exciting addition allows our registered users to quickly view and download their invoices from the convenience of their own computers. Our customers are able to manage their accounts better and spend less time on the telephone.

If you are new to Fleetguard Access, please register* at cumminsfiltration.com for access to the new invoicing functionality along with order and shipment information, packing slips, product availability and shipment tracking.

If you have questions or need additional information about online invoicing or any of the other features on Fleetguard Access, please contact your Customer Assistance or your Cummins Filtration Sales Representative. We are available to serve you 24 hours a day.

Thank you for your business.

* Fleetguard Access is available to current Cummins Filtration customers with a valid, company-assigned customer identification number. If you are unsure of your eligibility, contact Customer Assistance or your sales representative.
