Fleetguard introduces FuelPro® & DieselPro® Fuel Filtration Systems!

Fleetguard, a leading worldwide manufacturer of filtration, exhaust, chemicals and cooling system products for all diesel applications, introduces FuelPro® and DieselPro® Fuel Filtration systems for mobile on- and off-highway heavy-duty diesel applications. FuelPro® and DieselPro® units are total systems including a Fuel Filter Housing, Filter element, Fuel/Water Separator and optional in-built Fuel Heater. Fleetguard's clear cover and the unique "Seeing is believing®" technology provide instant visual indication of filter life, which optimizes filter change intervals and eliminates unnecessary changes and maintenance.

DieselPro®

FuelPro®

EleMax™

All FuelPro/ DieselPro systems are equipped with EleMax™ filter elements, which provide optimum performance and longer life compared to standard cartridge designs. The EleMax™ elements contain Fleetguard's proprietary multi-layer StrataPore™ media, which is recognized for its superior technology throughout the filtration industry. FuelPro® and DieselPro® systems are easy to install and apply to any mobile heavy-duty diesel application.
