### Fleetguard launches new 5.0 version of its Master Catalogue CD-ROM

Fleetguard, a leading worldwide manufacturer of filtration, exhaust, chemical and cooling system products for heavy-duty diesel applications, has released a new updated electronic Master Catalogue which incorporates the latest product information available. The catalogue CD also includes the new and enhanced 5.0 version of Fleetguard's interactive Fleet Manager which is now available in 10 languages (Dutch, English, French, German, Italian, Polish, Portuguese, Russian, Spanish and Swedish).

The Master Catalogue / Fleet Manager CD-ROM allows the user to search for product information on Fleetguard filters, coolant and service parts. Customers can search by application eg. OEM Brand, engine type, model or by cross-reference part number. The program incorporates Fleet Manager, a well-recognised tool that enables users to develop individual fleet profiles, maintenance schedules, personalised offers, invoices, and much more.

New features in the 5.0 version include Russian language, a filter search by dimensions (Air only) and over a thousand new product pictures.
