Fleetguard® Coolant & Chemical Products

Cummins Filtration also provides DEF, which is essential to support engines with SCR technology to meet emission requirements. Available in 2.5, 55, 330 gallon packages sizes in addition to bulk quantities. In addition to DEF, Cummins Filtration provides a wide range of coolants and fuel additives that are designed specifically for the challenges of today's modern fuel and cooling systems. To learn more about any of these coolant and chemical products, visit cumminsfiltration.com.
