

Cabin Air Filters

for Medium and Heavy Duty Applications

AIR

Cabin Air Filtration

Cummins Filtration has now broadened its product range to include Fleetguard cabin air filtration for Medium Duty applications to add to its existing range of Heavy Duty applications. This coverage makes Cummins Filtration the one-stop for your medium and heavy duty filtration needs.

Genuine Protection

Fleetguard Cabin Air filtration is a proven safeguard against air pollution in the cab and an excellent addition to your maintenance regimen. Designed to filter out mold spores, dust, soot, smog, mildew, pet dander, fungus, pollen, tobacco smoke, fumes, and other allergens and odors inside the vehicle, Fleetguard cabin air filters ensure driver and passenger comfort with safer breathing air. Plus, as an extra benefit to reduce overall cost of ownership – when changed regularly, cabin air filters help decrease wear on your vehicle's heating, ventilation and air conditioning systems.

Easy Service

As with all Cummins Filtration products, Fleetguard cabin air filters are easy to install and remove. Because the cabin filter is in the outside air intake, it filters most of the dust and pollen and is likely to plug before the other air filters on your equipment. Regular maintenance will ensure clean, pollution-free air in the cabin.

The cabin air filter is usually located in the outside air intake where it is visible with the hood open, or under the dash above the blower in the back section of the outside air intake, or between the blower and the rest of the HVAC case.

For maximum performance, replace your Fleetguard cabin air filter once a year or as specified by the vehicle/equipment manufacturer.

Customer Support

For more information on cabin air filtration or other Fleetguard products and services, please contact Customer Assistance at 800-22-FILTER or visit cumminsfiltration.com.
