## Nothing Guards Natural Gas Engines Like Fleetguard®

You can depend on Cummins Filtration to provide the highest-quality, longest-lasting and best-protecting products for your natural gas engines. We are the standard original equipment filters, coolant products and chemicals used in Cummins Westport natural gas engines, including:

### **Lube: LF9080**

Patented Venturi™ Combo technology for optimal flow. High-efficiency, multilayer StrataPore™ media provides three layers of gradient protection, allowing for optimized sludge removal and extended service life.

### **Fuel Filter: NG5900**

Low-pressure coalescing filter designed to remove oil, water and solid contamination from natural gas – 99% efficient at 0.3-micron coalescence.

### **Water Filter: WF2126**

StrataPore media filters out debris in coolant that causes engine wear, extending water pump and thermostat life. Contains slow-release DCA4 tablets for extended service.

### **Fleetguard Coolant and Chemical Products**

In addition to filters, Cummins Filtration offers a full range of the highest-quality coolant and chemical products for natural gas engines, including ES Compleat™ Antifreeze/Coolant.

ES Compleat OAT Extended Life Antifreeze/Coolant with patented organic acid technology provides superior protection against freezing, boil over, cavitation, liner pitting, erosion, corrosion, elastomer gasket degradation, and scaling. ES Compleat OAT lasts 3 years/300,000 miles (500,000 km) or 6,000 hours, and then a single replenishment of ES Compleat OAT Extender liquid doubles the service life.
