

Filter-in-Filter Fuel System Protection: New for 2010 Dodge Ram Trucks

Cummins Filtration introduces the **FS43255 Filter-in-Filter Fuel Cartridge**, a revolutionary new dual stage fuel filter that significantly improves diesel fuel filtration and water removal performance. The Fleetguard Filter-in-Filter 2010 fuel cartridge has been designed for the Cummins 6.7L Turbo Diesel in 2010 RAM Heavy Duty pickups and 2011 RAM Chassis Cabs. This fuel cartridge provides easier service access and reduces the amount of waste material during regular fuel system maintenance.

Uniquely constructed and combined with the proprietary synthetic StrataPore™ filter media, the FS43255 provides greater filter performance that exceeds the requirements of modern engines, fuel systems and fuel types. Important Filter-in-Filter features include:

- High efficiency free and emulsified fuel/water separation - ensuring greater protection from water-related problems in modern high pressure fuel systems.
- 2-stage particle removal that yields a 5-micron filtration rating @98.7% efficiency - for exceptional fuel system protection without the hassle of extra filters and plumbing.
- Optimal fuel system protection in a design that uses an easily serviceable filter housing and replacement of only the filter cartridge at service time*.

Benefits of Filter-in-Filter Technology

The two-stage configuration of the new Filter-in-Filter cleans the fuel and provides a proven approach to higher fuel/water separation – a critical requirement with High Pressure Common Rail (HPCR) fuel systems. Each stage combines to yield superior efficiency:

- The first stage provides the initial filtration and serves to coalesce water entrained in the fuel into larger droplets.
- The second stage removes the finer particles and strips the water droplets generated by the first-stage media.

Availability of the new Filter-in-Filter

The new fuel module with top-loading filter cartridge is standard on all Cummins-powered 2010 RAM Heavy Duty pickups and 2011 RAM Chassis Cabs. The service filter cartridge FS43255 (Cummins 4947561) is currently available at your local Fleetguard dealer. Contact your local dealer for additional information on the Fleetguard Filter-in-Filter or other genuine Fleetguard products
