

## Fleetguard Air Filters Meet REAL™ World Demands of Today's High Performance Engines

Meet the REAL World demands of today's high performance engines using superior Fleetguard air filtration technology with AF26300. Since autumn of 2005, the CAT C-15 ACERT air flow requirement is 1420-1450 CFM at 2100 RPM - 100 CFM increase over previous designs. This increased air flow requires advanced air filtration solutions to keep engines running smoothly under any conditions. The air filter AF26300 is an upgrade from AF25693 and offers these improved features:

- Superior performance at optimum air flow
- Improved water shedding performance
- Superior drying when subjected to very humid conditions

Depend on Fleetguard to meet all your REAL World air filtration needs. For more information about air filtration or other Fleetguard products, visit our website at [cumminsfiltration.com](http://cumminsfiltration.com).
