Filtration

## **Fleetguard® Protection for All Generations of Cummins Powered RAM Trucks (1989-Present)**

When first introduced in 1989, the Dodge RAM® pickup with the 5.9-liter Cummins Turbo Diesel engine changed the face of heavy-duty pickup trucks. Twenty-five years later, Cummins engines are still powering the RAM name and no one better ensures the longevity of those engines than Cummins Filtration. As a part of Cummins, all genuine Fleetguard products are developed and tested on Cummins engines and are guaranteed to offer your vehicle the best protection available.
