

Fleetguard® Diesel Exhaust Fluid Solutions

Genuine filtration to keep your SCR system healthy.

What is Diesel Exhaust Fluid?

- DEF (Diesel Exhaust Fluid) is a non-toxic solution of 67.5% water and 32.5% automotive grade urea and is one of the key elements of the SCR (Selective Catalytic Reduction) aftertreatment system intended to reduce NOx from the exhaust.
- SCR systems are installed with a DEF filter to ensure it is free of contaminants.

Benefits of Using DEF Filters:

- If DEF is not properly filtered, urea crystals and other contaminants gained during transport and storage can cause the SCR system to malfunction or not work properly.

Fleetguard UF101

Fleetguard DEF Filtration Solutions by Engine Application

Fleetguard Part Number	OEM Part Number	Application
UF101	5303604	2010+ Cummins® ISB6.7L & ISX15
	3783187	Wide range of CAT® equipment
	21516229	Volvo D8/D13K/D13C
UF104	A0001420289	2014 and older Detroit Diesel® DD15
UF106	4388378	Cummins X15, QSK19, 23, 60, 78, 95 & QST30
	A0001421089	2015+ Detroit Diesel® DD15

Servicing DEF Filters:

Many fleets replace annually, or by mileage, typically in the 120,000 to 150,000 mile range, but always consult your vehicle OEM guidelines.

The Best Warranty in the Business.

When you buy a Cummins Filtration product, you are assured superior warranty protection from the point of purchase throughout the recommended life of the product. Unlike industry competitors, our warranty coverage is not pro-rated, which means you are fully protected through the recommended service life of the product.
