

Fleetguard®

Fleetguard FF63042NN & FF63044NN Fuel Filters for Tier 2 & 4 QSK Engines

The Best just got Better.

Since the introduction of Tier 4 Emission Standards, the Fleetguard FF255 and FF256 fuel filters have been successfully protecting QSK high horsepower engines all over the world. Cummins Filtration is now proud to introduce the new FF63042NN and FF63044NN NanoNet™ filters.

Our new filters provide improved filtration of soft contamination in the fuel, thus increasing filter life and lowering total cost of ownership (TCO). The FF63042NN and FF63044NN featuring NanoNet media are required on Cummins Tier 4 engines to provide enhanced protection to the fuel injection equipment. On Cummins Tier 2 QSK engines, the new filters are required to extend the life of the C3 fuel injectors.

Our patented NanoNet® media is designed to reduce premature wear and damage of critical fuel injection system components by removing harmful particles and delivering fuel that meets FIE manufacturers' suggested ISO 12/9/6 cleanliness level.

Application	Tier 2 & 4 Cummins QSK23, 38, 50, 60L	Tier 2 & 4 Cummins QSK19
Previous Filter Part Number	FF256	FF255
New Filter Part Number	FF63042NN	FF63044NN

Best Warranty in the Business.

When you buy a Cummins Filtration product, you can rest assured that you have superior warranty protection from the point of purchase through the recommended life of the product. Unlike industry competitors, our warranty coverage is not pro-rated, which means you are fully protected through the recommended service life of the product.
