

New Product Bulletin

FleetSchool

Our FleetSchool program encompasses three levels of training.

Levels one and two consist of online training modules conducted at [FleetSchool](#) [1], **our online training portal.**

What is FleetSchool?

As filtration technology constantly changes to keep pace with new engine technology, FleetSchool is your most dependable resource for updated product and market information.

The program features easy-to-use, self-guided training modules that cover a wide variety of modern filtration and conditioning product topics. With short tutorials, self-assessments and online course monitoring, FleetSchool is an excellent training tool for trainees to become filtration experts from the convenience of their location.

[Don't have an account?](#) [2]

If you do not have an account, [you can request one](#) [2], **and a FleetSchool administrator will create your account. You will receive a confirmation email within 24 business hours.**

We encourage all Fleetguard dealers, distributors, and end users to complete levels one and two training. The advantages of doing so are numerous:

- Easy online completion accessed from any location
- Knowledge of the latest maintenance information
- Troubleshooting tips to protect an integrated engine system
- Partnership with customers to help reduce downtime and minimize operator hassles
- Email updates on new training courses, as created.

Advanced Specialist Training

In addition to level one and two training, level 3 advanced training is available to filtration specialists in the Fleetguard dealer and distributor network, subject to manager's approval. Level 3 training is led by our Technical Services Supervisor in a classroom environment at an agreed location. It is conducted over a two day period and is subject to minimum attendee numbers being reached. Completion of levels one and two training at [FleetSchool](#) [1] **is a pre-requisite for enrollment in level 3 training and trainees will be required to provide certificates for verification.**

Level 3 training is an interactive, hands-on learning experience that provides:

- Detailed insight into core filtration products and systems
- Filtration system troubleshooting
- Solutions using product technology that enhances our customers' Return on Investment (ROI)
- Insight into the hidden costs in doing business

- Filtration maintenance practices

Register your interest in attending level 3 advanced training by completing the form below:

Title *
First Name *
Last Name *
Company Name *
Role/Position *
Does your role require direct customer contact at the customers' site? * Yes
