

**Problem:** Fuel Contamination

**Solution:** NanoNet<sup>®</sup> Technology

**Fleetguard Fuel Filters:**

- protect your injectors better throughout the filter's service interval
- are not affected by water in fuel, like conventional cellulose filters
- trap and retain contaminants even under real world vibration and flow surge
- extend service intervals, maintain high efficiency, reduce downtime and maintenance costs

**NanoNet<sup>®</sup> advanced media technology provides the absolute best in filtration performance so you can depend on your equipment to get the job done every time.**
