 Injector Protector.

Nanotechnology-based media delivers 13 times better protection than conventional fuel filters,* reducing wear and saving the thousands of dollars it costs to replace a set of injectors in a 400-ton haul truck engine.

13X
Greater Protection

Guarding Your Bottom Line.

From fuel, air and lube filters to extended-life coolant/antifreeze and quality Diesel Exhaust Fluid (DEF), Fleetguard is a recognized expert, with innovative products that are proven to prolong engine life, increase productivity with reduced downtime and lower your total cost of operation. Nothing guards your bottom line like Fleetguard.

Fleetguard products are available at over 33,000 retail locations worldwide. For the location nearest you, see cumminsfiltration.com. In North America, customers who want more information can call 1-800-22FILTER (1-800-223-4583).

Nothing Guards Like Fleetguard®.

Filtration, Chemical And Lubricant Solutions For The Mining Market.

*Results found from internal testing
Devouring Dust.
Fleetguard® Magnum™ air filters have 25% more capacity than conventional air filters* and can triple the length of your service intervals. Three fewer filter changes per year saves hundreds of dollars in parts and labor costs alone.

Contamination Domination.
Innovative Fleetguard lube products capture up to three times more contaminants than full-synthetic filters*, including metal shards, rust and dust. You’ll be digging less out of your pocket and more out of the ground, since a replacement engine for a 300-ton haul truck costs $250,000 to $300,000.

Eliminating Up To 3x More Contaminants In Lube Systems

Spending Less. Accomplishing More.
Higher productivity. Reduced downtime. Lower fuel consumption. Extended engine life. It all adds up to a 42% reduction in total cost per ton* with the Fleetguard complete line of innovative products for your mining equipment.

Air Filters With 25% More Capacity

Total Cost Per Ton 42% Lower when using a complete Fleetguard filtration system package, on average.
