

Fleetguard® for Natural Gas Engines

Lower Emissions, Improved Performance, Lower Costs

With industry leading performance and first fit OEM availability, natural gas engines combine all the advantages of clean-burning, low cost natural gas with “no compromise” power and torque.

For shuttle, school bus, urban transit, vocational, and medium to heavy-duty truck and tractor applications.

The **Fleetguard NG5900** filter provides the following benefits:

- Offers high efficiency removal of suspended liquid and solid impurities
- Flow rates up to **120 lbs per hour**
- Pressure rating of up to 150 psig
- **99.99% efficient** at 25 microns

Specifications

Technical Profile	Value
Normal Operating Pressure	100-150 psig
Proof Pressure	250 psig
Burst Pressure	600 psig
Rated Flow	120 lbs/hr at 50 psig inlet
Particulate Filtration Efficiency	99.99% at 25 micron
Aerosol Filtration Efficiency	98% at 0.3 micron
Operating Temperature	-40 to 250 °F (-40 to 121 °C)
Clearance for Filter Removal	1.7" (4.4 cm)
Sump Capacity	12 oz
US Code	NFPA52

Specifications subject to change without notice.
